Method 2: Convert Audible to MP3 by Recording

Another path is using a recording software, Moo0 Voice Recorder, another application which works on audible to mp3 conversion. Actually, it can not convert the Audible .aa or .aax to MP3 directly, but it can record the Audible book and choose MP3 as output format.

1 Install necessary apps

Apps you need to install: 1, Audible for PC app--Windows 10, Windows 10 Mobile, Windows Phone 8.1, Windows Phone 8

2, Moo0 Voice Recorder --Windows

First of all, you need to install the above two softwares. Audible app is released by Amazon company, which allow you manage your audible books in library. Since Audible books can only play on limited player, we have to play audible books by this player.

Moo0 Voice Recorder is a very simple and easy to use sound recorder. Since this program can capture any sounds on your PC, you may use it to record Internet radio, streaming music, Skype calls and even some songs from your video files.

2 Recording Audible book and save as MP3 file

When above two apps have been installed successfully, you can start the recording. Open the Moo0 Voice Recorder, select recording folder, choose MP3 as the output format, and then click the "Start Recording". At the same time, play the audible books you want to convert on Audible. Then what you have to do is wait the audible book to finish the playing and click " stop". Your recording will be saved as MP3 file.

It may take a full night to record one book, but that's a way of doing it. It is a little bit waste of time compared with method 1.

Method 3: Convert Audible to Buring a CD via iTunes

To convert Audible .aa or .aax book to MP3 format, you can use iTune to import the .aa book to creat an audio CD, and re-import the audibook off the CD using iTunes built-in MP3 encoder. It is a little bit complex, but you can also get what you want.

Open iTunes, click "File>new>playlist" to creat a new playlist and name it after the title of the audiobook. Then, drag the audiobooks into the new playlist.

3 Burn a CD via iTunes

To burn a CD, first of all, insert a blank CD to your compuer. Select the playlist and click "Burn Disc", then choose your CD burner and write speed, and click on" Burn" to start the process. Since the audiobooks are very long and may can not fit onto one single CD, a warning will be display. You can choose burn the file accross multiple CDs if the options are given.

4 Import MP3 audiobook

Open the "General Preferences", click" Edit>Preferences". Then click "Import Settings" and ensure you are selecting "MP3 Encoder." Click "OK" to save the changes.

The above method works but for me wasted a lot of CDs.
